

silicone acetate white 280ml

Product Description

This product is a white silicone acetate, supplied in a 280 ml unit size. It belongs to the Adhesives category and is intended for sealing and bonding tasks where a silicone product in white is required.

No further technical data was provided for this item. Properties such as curing time, temperature range, adhesion, and compatibility with substrates are not stated here. Please refer to the manufacturer's technical data sheet or contact the supplier for detailed specifications before use.

Features

- Silicone acetate type
- White colour
- 280 ml content
- Listed in the Adhesives category

Applications

Suitable for general sealing and bonding work where a white silicone acetate product is specified. Confirm suitability for the specific substrate and application with the manufacturer's documentation before use.

Technical Specifications

Hardness (Shore A)	25 Shore A
Elongation at break	500 %
Tensile strength	0.5 MPa
Chemical base	Acetoxy silicone
Skin formation time	15 - 120 min
Cure rate	2 mm/24 h
Service temperature	5 - 60 °C
Application temperature	5 - 40 °C
Density	94 g/ml
Shelf life	12 months

Available Variants

Part number	Colour	Volume
SLAD00001	White	280 ml

Packaging

12
